

経営理念

Management Philosophy

We will serve society by striving to acquire the latest technology, being creative and ingenious, creating a structure that can respond to drastic changes, and making great strides forward.

品質方針

Quality Policy

- 【 1 We will strive to acquire the latest technology and to be creative in providing products that meet our customers' requirements.
(SDG Goal 9)
- 【 2 We will work for continuous improvement to ensure that our quality management system remains effective.
- 【 3 We will comply with customer requirements, regulations, and various laws and regulations.
(SDG Goal 16)
- 【 4 We establish and implement quality objectives and conduct periodic reviews to ensure customer satisfaction.

環境方針

Environmental Policy

- 【 1 We aim to be an environmentally friendly company by establishing environmental objectives and targets to improve our environmental performance and by implementing continuous improvement of our management system.
(SDG Goal 12)
- 【 2 We will comply with environmental laws, regulations, and other requirements.
(SDG Goal 16)
- 【 3 We will strive to prevent environmental pollution and protect the environment by proactively engaging in the following environmental improvement activities through our business activities.
(SDG Goal 12)
 - ・ Reduce CO2 emissions and increase efficiency of resource and energy consumption **(SDG Goal 7 and 13)**
 - ・ Reduction and recycling of waste in production activities **(SDG Goal 6 and 13)**
- 【 4 We will strive to cooperate and coexist with local communities.
(SDG Goal 11)

Our quality and environmental policies will be disclosed on our website.
